

## WOODBURY PUBLIC LIBRARY PROGRAMMING POLICY

Programming is an important function of Library services as it attracts new users to the Library. Presentations and events increase public awareness of the Library's resources and services to the community. Programs also help the Library to become a resource center of learning, information, and culture.

The Library upholds the principles of Intellectual Freedom and strives to provide programming that is informative, educational, and/or recreational to meet the needs of all members of the community.

**It should be noted that the views and opinions expressed in the programs are those of the presenter/organization and do not necessarily reflect those of the Woodbury Public Library or the staff.**

Film programming consists of award-winning, well reviewed, quality films that are licensed for public viewing. Titles are selected for public presentation by professional librarians and/or the Library Director.

All programming is decided upon by professional librarians and approved by the Library Director.

In regard to certain programs, medical, legal, financial and any involving physical activity, such as yoga, exercise, etc., program presenters must be qualified and certified. The public is made aware of the qualifications of the presenters for each of these programs.
